

## Connecting to VPN from a college laptop

Once you have logged into the laptop

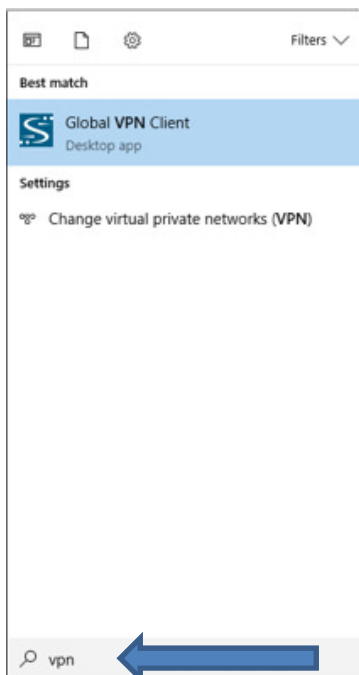

Make sure that you have a Wired or Wireless connection

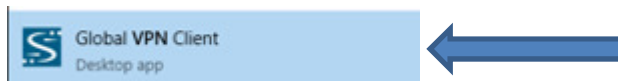

Then go to the Start Icon which is in the lower left corner of the monitor

Type in VPN

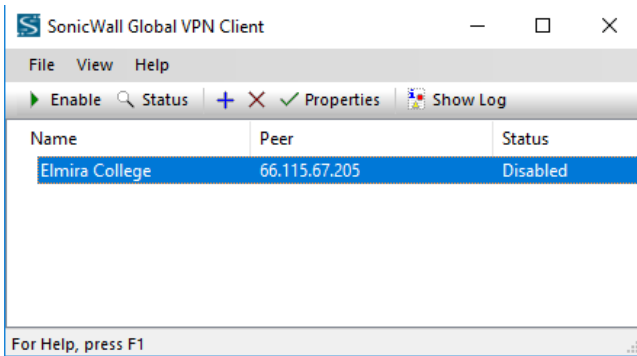

Select Global VPN Client

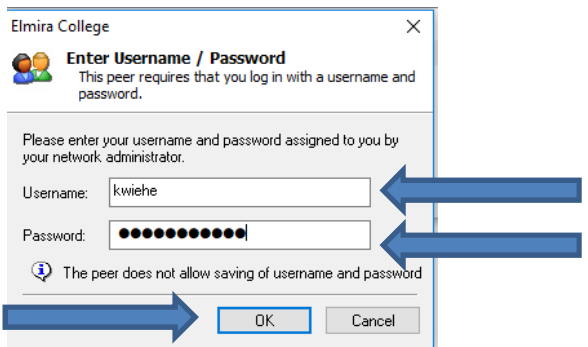

# Connecting to VPN from a college laptop

A new window will show up on your screen

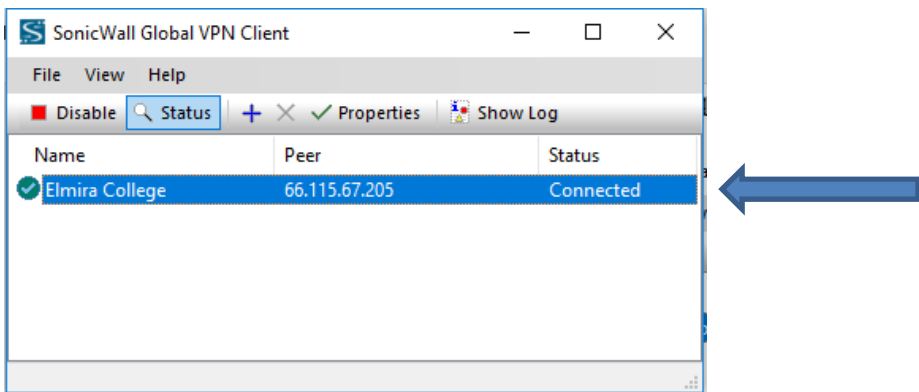

Select Enable

Enter your Elmira College username and current password. Then select OK.

The connection will be made from the laptop to the college's networks. The new SonicWall Global VPN Client will show you are connected.

You will now be able to use the laptop and software installed to complete work.
